CHANGING OF BAG FILTER PACKAGING BOXES AND LABELS

Dear Colleagues

Eaton Filtration Shanghai will change the filter bag packaging and bag labels to the Eaton packaging from 10 April 2006 and single bag vessel packaging from 17 April 2006. This is to reflect our new parentage.

SCOPE

Effective 10 April 2006, we will change our filter bag packaging and labels to the new packaging with Eaton logo and liveries. All 3 sizes of filter bag boxes will be changed. The following photographs and drawings will provide both visuals and dimensions of the various boxes and labels.

Single bag filter vessel packaging and name plates will be changed to Eaton boxes and name plates from 17 April 2006. The following photographs will provide visuals and dimensions.

This will be a phase in phase out exercise. All current finished goods packed and ready for shipment in our inventory will remain with previous Hayward boxes and will be depleted to meet your orders. Therefore you may still receive finished goods in Hayward packaging after the cut in dates until the existing inventories are depleted. However each batch of finished goods will be uniform and be packed in the same type of cartons.
